

# ESC 200

New domotic power interface board

#### TYPICAL USE:

Lights  
(On-Off mode)

Table /TV lift

Blinds

Curtains

Automatic doors

Power Supply:  
24 V<sub>DC</sub> (Voltage range 20÷30 V<sub>DC</sub>)

Current consumption (by electronic board):  
60 mA

Type of Loads controlled:  
Resistive (AC-1); Inductive (AC-7a.)

Hardware configuration for Modbus and DMX512:  
RS 485 (optoisolated)

Internal Relay RINA approved

Max output power (per each channel):  
140W @24 V<sub>DC</sub> or 900W @230 V<sub>AC</sub> for Resistive Load; 500W @230 V<sub>AC</sub> for Inductive Load

N° 6 of output channel

N° 6 of input control channel.  
(Normally Open type) for local control

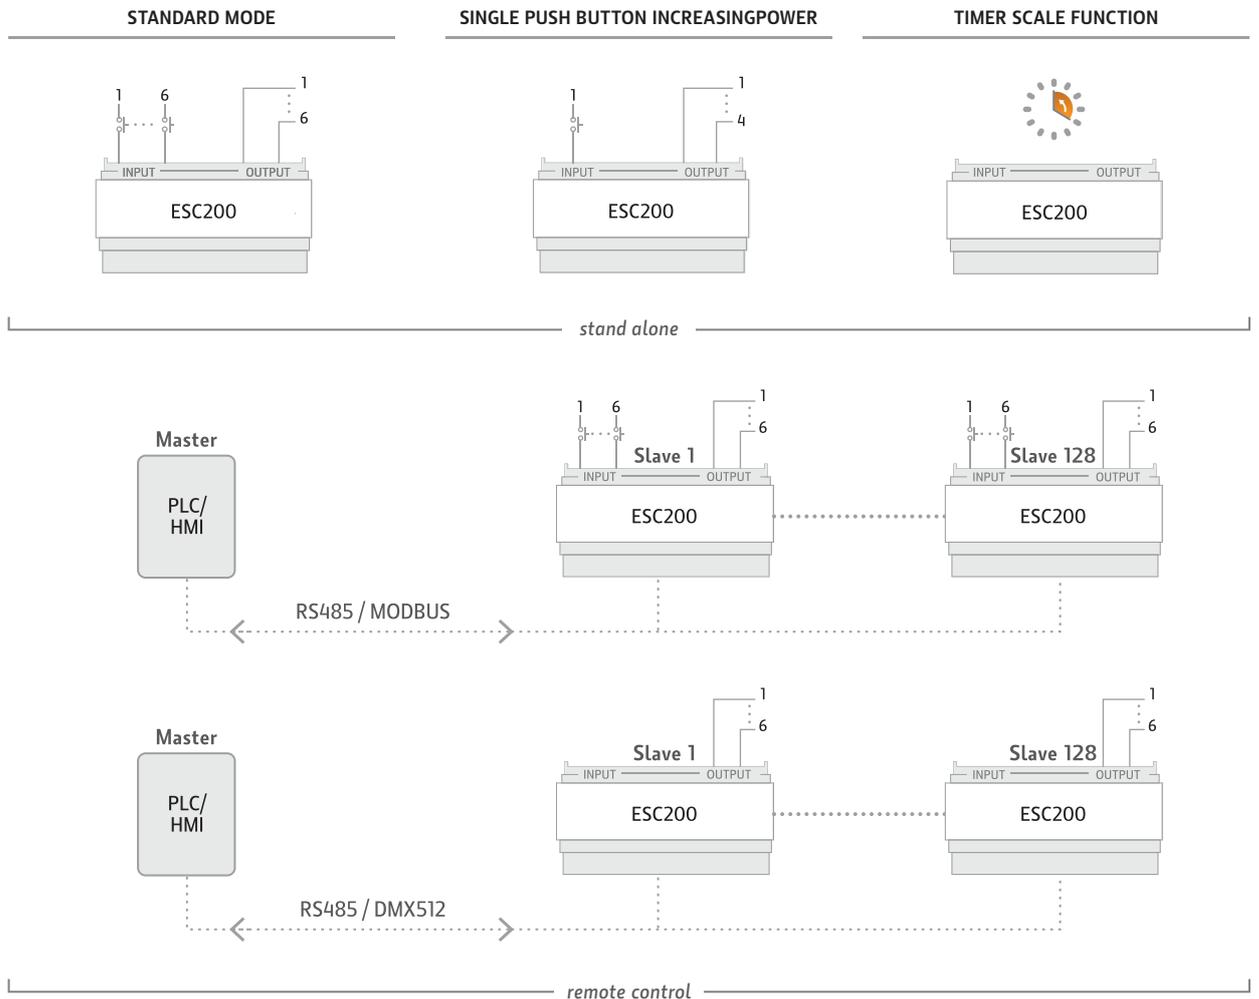

Protocol (external network/monitoring):  
- Modbus RTU  
- DMX512 on request  
Up to 128 ESC200 can be controlled

Channel protection:  
fast fuse (6,3x30 glass, 6A included).  
Size fuses according load properties.

Protection level: IP 20

Mounting: DIN; wall.

Dimensions WxHxD (mm)/DIN modules:  
168x98x60 / 9 DIN

## FEATURES

Operating switching mode:

Monostable mode

Bistable mode

Single Pushbutton Increasing Power:

by a single pushbutton is possible to control up to 4 output at the same time

Timer scale function (on request):

keeps the light on for a defined time, per each channel

Terminals:

removable; multicore fixing wires up to 2,5 mm<sup>2</sup> (12 AWG)

Self-restoring fuse

Status LED:

testify proper functioning of the serial communication

Operating channel LED:

each channel is equipped with a LED that indicates if the channel relays is turned On

Compliance rules: CEI EN 60945 Ed.4

Material (case): v-0; (according UL-94, on request)

### OPTIONAL:

LED status signal:

each channel can drive LEDs up to 50 mA of current consumption

---

ESC 200

Safety in First Class
